

Angkabdoi. (2024, April), Petunia potted plant with bright colored flowers : Home and Garden : 112-113

Petunia is one of the most popular hanging potted plants. Because it has large, brightly colored flowers, it is easy to grow and can withstand heat well, especially when the beautiful flowers bloom all at once to admire. It makes people like brightly colored flowers.

Panax, whose scientific name is Panax hybrids, is a short-lived flowering plant. The layer is a bush 30-45 centimeters high or creeping. Every part of the plant is covered with soft hairs. The leaves are bright green and the flowers bloom in the leaf axils. Diameter 3-4 centimeters. There are both single and double flowers. The petals are thin. The flowers are trumpet-shaped. The tips are spread out. The edges of the petals are smooth or wavy. There are white, pink, yellow, orange, purple, blue, red, and two colors in the same flower. There are many varieties. Flowering throughout the year for a long time. 3-6 months (depending on care)

Today's ornamental peach tunias are hybrids of P axions, which produce large white flowers, and P integralia, which produce small red or purple flowers. Examples of different groups of petunias that are generally sold

Petunla Wave Series Petunla Wave Series P'Nia Saw Group It is a traditional variety that has been grown as an ornamental plant for a long time. The flowers are large, 7-8 centimeters, and come in many colors, including red, purple, and pink. They produce abundant flowers throughout the year. Strong and heat-resistant.

Petunia Easy Rider Series, a group of petunias with a compact canopy, large flowers, 8-9 centimeters in diameter, strong, withstands heat well, and fast-growing plants.

Petunia Mirage Series Petunia Mirage Series, a group of petunia with a compact canopy, medium-sized flowers, 6-7 centimeters in diameter, available in many colors, including single colors, striped flowers, white or cream-colored flowers on the central branches. And the flowers are star-shaped, white and strong.

Petunia Wave Petunla Easy Wave Series Petunia Group Large flowers with a compact canopy, large in diameter, 8-9 centimeters, strong, tolerates heat well, and grows quickly.

Petunia Opera Supreme Series, a group of climbing petunias, medium sized, 6-7 centimeters in diameter. During the summer it produces many flowers.

New hybrid petunia It is a group with a compact canopy, medium-sized flowers, 6-7 centimeters in diameter, two-colored flowers with a white or yellow stripe running down the center of the petals. Gives lots of flowers during the summer

Petunias like sunlight most of the day. During the rainy season, we often encounter problems with rotting. Broken petals folded You should prepare planting soil that drains well and move it to a location that receives less rain. This will help keep the canopy compact and bloom throughout the year.

Indira Salee. (2024, May), Being a vegan can eat cheese: Gourmet & Cuisine: 74-75

Cheese is a food that is processed from animal milk. And used to make a variety of dishes, from savory dishes to desserts. It is so popular among people that it has been given the name "Cheese Lover", but it must be admitted that cheese does not meet the needs of every group of people. Especially people who eat vegan. Thus, the product Vegan Cheese was born. Vegan cheese is usually made from nuts. Or plant base ingredients can replace regular cheese in both texture and taste. There are also a variety of cheeses to choose from.

Normally, people who eat vegan don't have to say goodbye to eating cheese forever.

Most vegan cheeses come from five main ingredients.

1. Soybeans and Tofu
2. Nuts and seeds such as almonds, macadamias, pistachios, cashew nuts, pumpkin seeds, etc.
3. Flour such as corn starch, tapioca starch, all-purpose wheat flour.
4. Coconut milk or coconut oil
5. Various additives such as nutritional yeast, mustard powder, dried herbs, apple cider. The form of vegan cheese is the same as regular cheese. It comes in chunks, shredded, and shredded. Its uses may vary. Vegan cheese slices are often used for cooking or cheese balls. As for the shredded cheese, it is usually put on top of the pizza.

If it's soft cream cheese, use it to make bread. Make Spinach Artichoke Cheese Dip You can also use vegan cheese such as crimson cheese. You will see that it is not different from using normal cheese at all.

Some people may think Vegan cheese is quite a niche food, but it's actually more common these days. Many brands of vegan cheese Thailand also has the same. Or if it's easy to buy It will be a vegan cheese slice from Imperial, a brand that Thai people are familiar with.

Can vegan cheese really help save the planet? No matter what kind of food The production process is also part of the release of carbon dioxide into the atmosphere. Ski cheese production as well

In addition to environmental issues The ethics of raising animals is something that vegans are very concerned about. Because in order to use milk from a cow to make cheese, the mother cow and calf must be separated. Otherwise, milking will be difficult, causing some cows to accumulate stress. which vegans consider to be cruelty to animals

But no one has definitively confirmed that eating vegan cheese is better for the planet. This is because some manufacturers use ingredients that have undergone a process that disturbs nature. Ultimately, whether you eat regular cheese or vegan cheese, you have to carefully consider whether the producing company is properly certified or not. To ensure that it is delicious without too much impact on the environment.
