Abstract

Presenting content about Learning from Disasters: As many regions of the world grapple with storms, floods, wildfires, and other natural calamities, a new generation of experts from around the globe is finding ways to turn crises into opportunities. The 2025 Hat Yai Flood: A Costly Lesson and Warning Signs from a World We Can No Longer Ignore. Best of the World 2026: National Geographic explorers, photographers, and editors worldwide have selected 25 destinations ready to spark your next adventure. Decoding the World's Lost Written Languages with New Technologies Like Artificial Intelligence (AI): Scholars are racing to unravel the secrets of previously undeciphered written language patterns. Glistening Industrial Dumps, Like Glaciers: Northwest India sees marble dumps transformed into enchanting tourist attractions. Elephants Communicate with Their Trunks: New research indicates elephants exhibit a communication ability once believed to be exclusive to primates. The Science and Art of Trail Design: Trail designers worldwide are employing new techniques to create stunning and transform your hiking experience at every step. Female Alpha Males Dominate the Meerkat World: As one corner of Africa heats up, new research shows that... The future of the meerkats depends on the female leader, who must make a difficult decision for her survival.
