Abstract

Presenting content about Explore Phu Phrabat, a land of sacredness and faith. What hidden meaning lies behind the unique and bizarre rock formations of Thailand's newest World Heritage site? THE NATIONAL GEOGRAPHIC 33 celebrates the courageous problem solvers from around the world who believe the world needs creative solutions and urgent action, and who have stepped up to lead the way in sparking change. Explore the roots of the Chia Pet, the quirky terracotta potted planter we see online, which has played a significant role in the religious culture of the Haka people of Mexico. Living history at Abu Dhabi's brand-new Natural History Museum. The curatorial team wants visitors to get up close and personal with some of the most amazing creatures ever found. The Texas thorny lizard is everywhere, except where it belongs. A collaboration between scientists and ranchers is saving this iconic Texas symbol from the brink of extinction. Disappear and return: Off the coast of Croatia, an attempt to unravel the mysteries surrounding a Byzantine shipwreck may lead to new understandings of one of the greatest empires ever.
