Washington, DC 20036

CONTENTS

322-371 ARTICLES

322 Converting Between Dates in the Hebrew and Roman Calendars
By John Conway, Gabrielle Agus, and David Slusky

330 Euler's Limit and Stirling's Estimate
By Adam Hammett

337 Discontinuous Functions as Limits of Compactly Supported Formulas
By J. Marshall Ash

345 Formula for the Computation of the Matrix Exponential
By João Teixeira and Maria João Borges

351 Matrix Solution to Gergonne's Pile Problem
By Mervlyn Moodley

358 The Fifth Decade of the CMJ
By Brian Hopkins

360 Analyzing Proportionality Coefficients in Differential Equation Models
By Paul Laumakis

369 George Pólya Awards for 2020

371 Proof Without Words: Centered Nonagonal Numbers are Triangular
By Günhan Caglayan

372-377 CLASSROOM CAPSULES

372 The Natural Frequency: More Natural and More Frequent than Expected
By William R. Green

375 A Difference Equation Approach to Finite Differences of Polynomials
By Michael A. Jones

378-384 BOOK REVIEW

378 *A Guide to Higher Learning* by Julie Chen
Reviewed by Oksana Rubis and Kathleen M. Clark

385 Geometric Series in an Equilateral Triangle—Three Proofs Without Words
By Stephan Berendonk

386-392 PROBLEMS AND SOLUTIONS

393-400 MEDIA HIGHLIGHTS
